

CRYPTO-AGILITY: SECURITY WITHOUT COMPROMISE

Senetas high-assurance network data encryptors provide **state-of-the-art cryptography** - meeting the broadest range of international encryption certification standards.

Cryptographic protocols and algorithms evolve over time to counter new security threats – that's why **Senetas encryptors** are designed to be **"crypto-agile"** out of the box. They provide extra assurance that your investment keeps pace with **cryptographic advances**.

*Features may vary by product

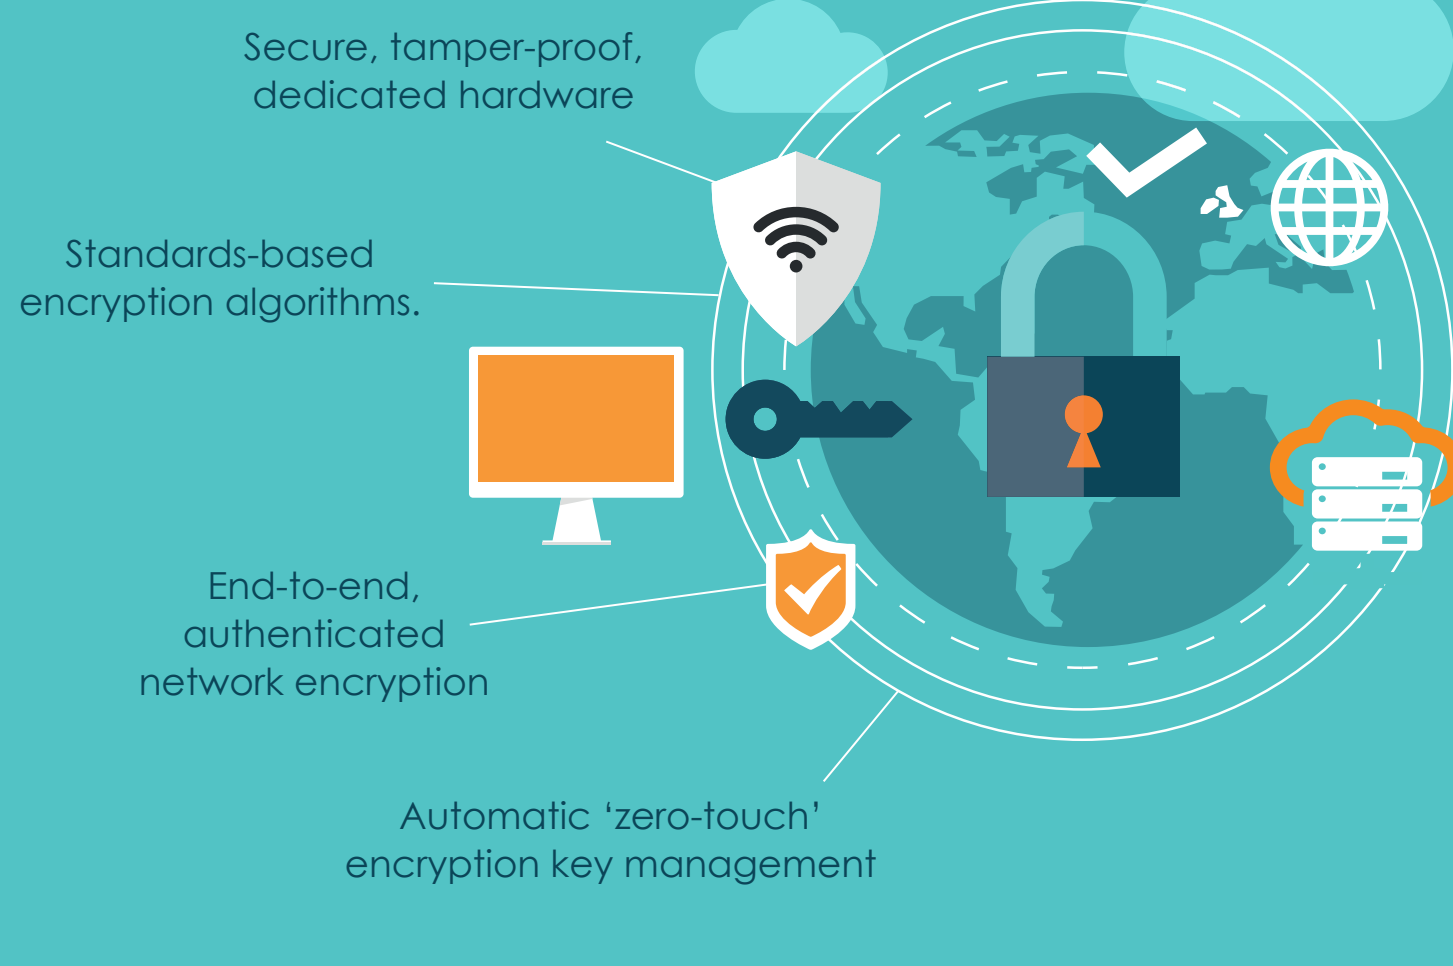

CUSTOM ENCRYPTION

Wherever you are, whatever regional encryption standards you require; Senetas encryptors are agile by design and support custom encryption services and algorithms.

WHAT IS HIGH-ASSURANCE?

Not all encryption solutions are the same. Today's high-speed data networks requires a robust encryption solution that provides certified, high-assurance network security and maximum network and application performance, without compromise.

Senetas CN Series hardware encryptors and CV Series virtual encryptors are distributed and supported internationally by Gemalto under its SafeNet brand; within the US Federal Government by SafeNet Assured Technologies, and throughout Australia and New Zealand by Senetas and accredited partners.

Senetas is a leading developer of encryption security solutions; trusted to protect enterprise, government, defence, Cloud and service provider data in over 35 countries. From certified high-assurance hardware, and virtualized encryption, to secure file sharing with data sovereignty control, all are based on the same crypto-agile platform and deliver security without compromise.
