VOTIRO CLOUD

NEXT GENERATION FILE SECURITY

VOTIRO

DEFENDING AGAINST UNDISCLOSED ATTACKS

Standard security systems stand powerless in the face of undisclosed threats, but they can and should be stopped.

Sophisticated file-borne malware can easily penetrate any organisation by exploiting standard digital transactions. Votiro Cloud is the only proactive defence that stops these threats before they even reach your network.

Votiro sanitises incoming files, eliminating the risks associated with malicious content, including zero day or undisclosed attacks, whilst preserving 100% file functionality.

No matter the file type or platform, we'll keep your files safe. Now and always.

TAKING CYBERSECURITY TO THE NEXT LEVEL

Votiro's patented solution is a proactive, signature-less technology. It targets the most commonly exploited file formats and protects against the most advanced, persistent cyber-attacks.

Votiro supports the broadest range of file formats:

PST XLS PDF DOC

PNG PPT TXT ICHITARO

VISIO GIF HANCOM JPG

It neutralises exploit attempts before they're disclosed, and before any other security system can provide protection against them.

SAFE. SECURE. EFFECTIVE.

Votiro Cloud provides enterprise-wide protection of incoming and outgoing files. Patented technology secures files against malicious content originating from the web, via email, content collaboration and file transfer applications.

Email

Web

Content Collaboration Platforms

File Transfer

Safe
Preserve 100% functionality of content once neturalised from threats.

Secure
Disarm files from zero-day and other undisclosed attacks, no matter the source.

Effective
Integrate with existing security infrastructure and avoid complex policy management.
THREE STAGES TO NEUTRALISATION

01 | **Scan**
The received file is scanned for known threats.

02 | **Disarm**
The file is broken down into its basic objects. Each individual section, alongside metadata, is analysed and any malicious content removed.

03 | **Reconstruct**
The cleansed file is reconstructed with its original integrity and functionality preserved. It's now safe to save and edit.

DISARM WITH CONFIDENCE

Votiro defends your data against all malicious content, including:

|			
Virus	Worm	Trojan Horse	Spyware

Adware	Ransomware	Malvertising

What's more, it does so without compromising network performance. Your cybersecurity will be transformed with no negative impact on your users.

"I cannot stress this enough –
Votiro is our front door. Without it,
we can't provide our services."

Michael Muscato, Founder of Twisted Ceptors
